DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following categories of patentably distinct species of the claimed invention:

I. Elastomeric Foam

- a. comprising at least one foam structure layer, as set forth in claim 1;
- b. comprising at least one foam structure layer and one or more substrate layer, as set forth in claim 1;
- c. comprising at least one foam structure layer and at least one waterproof elastomeric layer, as set forth in claim 9;
- d. comprising at least two foam structure layers and at least one waterproof elastomeric layer, as set forth in claim 10;
- e. comprising at least two foam structure layers and a knitted fabric, as set forth in claims 11 and 12;
- f. comprising at least one foam structure layer, one waterproof layer, and a knitted fabric, as set forth in claims 11 and 12;

II. Substrate Material

- a. select one of the species set forth in claim 7;
- b. select one of the species set forth in claim 8.

III. Surface Treatment

- a. as set forth in claim 13;

- b. as set forth in claim 14;
- c. as set forth in claim 15;
- d. as set forth in claim 16.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each category, mutually elected species will be prosecuted on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 2-8 are generic to claims 1 and 9-11.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S. Chang whose telephone number is 571-272-1474. The examiner can normally be reached on 8:30 - 5:00.
